DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species: Species I in figure 2; Species II in figure 3; Species III in figure 5; Species IV in figure 6; Species V in figure 7; Species VI in figure 8a, Species VII in figure 8b, Species VIII in figure 9, Species IX in figure 10, Species X in figure 11; Species XI in figure 12; Species XII in figure 13b; Species XIII in figure 13b; Species XIV in figure 16a, Species XV in figure 16b; Species XVI in figure 16c; Species XVII in figure 17; Species XVIII in figure 18; Species XIX in figure 19b; Species XX in figure 20; Species XXI in figure 22; Species XXII in figure 23; Species XXIII in figures 24a-d; Species XXIV in figures 25a-b; Species XXV in figure 26; Species XXVI in figure 27; Species XXVII in figures 28a-c; Species XXVIII in figures 29a-b; Species XXIX in figure 30; Species XXX in figure 31; Species XXXI in figure 35; Species XXXII in figure 36; Species XXXIII in figure 37; Species XXXIV in figures 40a-b; Species XXXV in figure 41; Species XXXVI in figure 42; Species XXXVII in figure 43. The species are independent or distinct because they disclose various embodiments of the invention.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 3739

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
